Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heyraud.

Heyraud discloses a hand held torque wrench with features of the claimed invention including a first section (figure 1, element 1) having a display means (element 6) to show an applied torque, a second section (element 2) having means for grasping a desired object, means for connecting two sections together, which include a strain gauge load cell related to the display means (see also claim 1).

Although, Heyraud's device appears to be versatile and can be used in any application, he does not specifically recite the application of his device to a container enclosure. It would have been obvious however, for a skilled artisan at the time of the invention to use his device for any reasonable intention including an enclosure of a container. Because when all fundamental elements of an apparatus claim are presented in a prior art, the mere application of the device in a specific environment fails to provide for an unobvious advantage or a patentable distinction.

Regarding claim 5, the second section has a depending closure gripping device.

Regarding claim 6, the closure has an opening.

Art Unit: 2855

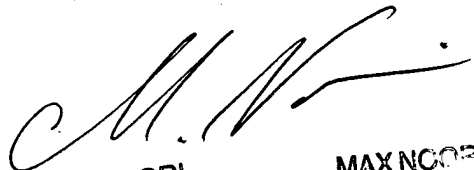

3. Claims 2-4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.
